## **AscendTMS™ Announces Logistics First; Free Document Imaging And Management**

***Capture, Save, Distribute, and Manage Any Document Image With AscendTMS™***

Brandon, FL – February 1, 2016

InMotion Global, Inc. announced today that it released its latest Document Management and Imaging features, for free, to AscendTMS™ users. It allows complete capture and management of any document related to loads, drivers, carriers, locations, and customers. Moreover, it also seamlessly manages company documents like credit applications, customer packets, and driver paperwork within one unified transportation management system (TMS).

Tim Higham, president and CEO of InMotion Global said; “Managing signed paperwork such as POD’s, BOL’s, Load Confirmations and Rate Confirmations is key to getting paid faster. AscendTMS™ now provides our users with a near paperless office solution at no extra cost to them. Better still, final invoices can be sent via email from within AscendTMS™ along with all of the supporting load paperwork and documentation. That means AscendTMS™ users get paid a lot faster”.

AscendTMS™ has become the go-to TMS system in terms of freight brokerage software, trucking software and shipping software. All updates and new features are released for free to premium users every 2 weeks. Moreover, all new feature ideas requested by users are written for free as long as the entire user community benefits from the new idea.

Higham continued; “Document management is key for a profitable logistics operation. On average, each load consists of 11 pages of paper documentation, many of which are required to be signed, and sent to the customer to get paid. In addition, drivers, carriers and customers also need to pass paperwork back and forth for contractual reasons. Now, the AscendTMS™ document management feature takes care of everything for the user, without paper, for every aspect of the company’s operations. That means much faster payments and an organized, paperless, office.”

AscendTMS™ continues to be the only transportation management system (TMS) offered at no cost for the base system, it’s the only TMS that can be launched immediately from a website by new users, and it’s the only TMS offering requiring no contract, no upfront fees, and no long-term license

agreement. AscendTMS™ continues to be the world's leading cloud based freight brokerage software, trucking software, and shipping software, and has won every major industry award over the last 14 years.

**About InMotion Global:** InMotion Global, Inc. provides the free, award-winning, patent-pending Transportation Management System, AscendTMS®, to freight shippers, freight brokers, and trucking companies. AscendTMS® is used by thousands of companies in 19 countries, from small single-person logistics operations to multi-billion dollar international corporations, to manage any logistics operation.
