AscendTMS™ Delivers New Zero Cost Accounting Features – No Outside Accounting Software Needed.

AscendTMS™ Users Can Now Perform All Accounting Functions Internally Without the Need For An Additional Accounting Software Package.

Brandon, FL – March 29, 2016

InMotion Global, Inc. today announced that it has integrated a full list of logistics accounting features within AscendTMS™, at no cost, without the need for a third party accounting package like QuickBooks, FreshBooks or Microsoft Dynamics.

Tim Higham, president and CEO of InMotion Global, Inc., said, “About 40% of our users were not integrating their outside accounting packages with AscendTMS™, even though they could. After talking to many of them, they asked us to add all the accounting features they needed inside AscendTMS™. So, in addition to the existing invoicing and POD management capabilities already within AscendTMS™, we have added, at no cost, accounts receivable reporting, accounts payable reporting, driver and carrier settlement, credit limit management, payment terms management, advance management, payment short pay, carrier deduction management, and enhanced financial user views.”

In addition to these new accounting features, AscendTMS™ also announced fully customizable load management screens, new real-time drag and drop column ordering, font size management, and mass load status changes.

Higham added, “We write new feature code for whatever our users ask for, at no cost to them, as long as the entire AscendTMS™ user community benefits. Every single new feature added today started with a user request. No other transportation management software in the world does this for its user community and it’s why we are the fastest growing freight brokerage software, trucking software, and shipping software available today”.

AscendTMS™ continues to be the only transportation management system (TMS) offered at no cost for the base system and is the only TMS that can be launched immediately from a website by new users with no contract, no upfront fees, and no long-term license agreement. AscendTMS™ continues

to be the world's leading cloud based freight brokerage software, trucking software, and shipping software, and has won every major industry award over the last 14 years.

About InMotion Global: InMotion Global, Inc. provides the free, award-winning, patent-pending Transportation Management System, AscendTMS®, to freight shippers, freight brokers, and trucking companies. AscendTMS® is used by thousands of companies in 19 countries, from small single-person logistics operations to multi-billion dollar international corporations, to manage any logistics operation.
