Trucker Path Joins AscendTMS™ to Offer Free Transportation Management Software (TMS) to Carriers and Brokers

AscendTMS™ Gives One Click Access To Trucker Path's Vast Load Posting and Carrier Network

Brandon, FL – June 29th, 2016

InMotion Global, Inc. announced today that it has integrated AscendTMS™, the leading cloud-based transportation management system (TMS) for trucking companies, freight brokers, third party logistics providers and freight shippers, with the Trucker Path *Truckloads* online marketplace.

Released in late 2015, the Trucker Path *Truckloads* network is the fastest growing capacity platform in the United States trucking industry. A large community of freight companies and motor carriers use the mobile and web-based versions of *Truckloads* to source loads using real-time information on available truck capacity with verified driver location data.

Trucker Path hit industry radar in 2013 with the release of a free crowdsourcing trip planning and resource locator mobile app for professional drivers. More than 450,000 independent operators and company drivers now use the Trucker Path Pro app to locate available truck parking, monitor fuel prices, receive navigational assistance, and optimize other daily trip-planning activities.

Ivan Tsybaev, Founder and CEO of Trucker Path, believes the partnership is a perfect match as it gives freight companies and motor carriers immediate access to a unified technology solution to increase load volumes, revenues and profits.

“Now that AscendTMS™ is connected to our vast driver network, the brokers, carriers and shippers that use the AscendTMS™ TMS solution can push out available loads directly from their TMS system to get immediate access to available capacity,” Tsybaev stated.

Tim Higham, president and CEO of InMotion Global, Inc. said, “This is yet another major milestone for AscendTMS™ and our fast growing client base. Our clients want a unified TMS eco-system that runs their entire logistics business, and will connect seamlessly to THEIR partners, like Trucker Path. We are the first and only TMS provider to give load posting access to Trucker Path’s vast network, and that means more full trucks and more profits for everyone.”

In addition to the new Trucker Path offering, AscendTMS™ provides fully customizable load management screens, free GPS load tracking built into the TMS, load posting to 53 different load boards. The platform also provides document management, free driver texting, fleet and asset management, load funding, brokerage management, easy accounting, full reporting, user role management, branch and agent management and more.

AscendTMS™ continues to be the only transportation management system (TMS) offered at no cost for the base system. It is also the only TMS that can be launched immediately from a website by new users with no contract, upfront fees, credit card, or a long-term license agreement. AscendTMS™ continues to be the world’s leading cloud-based freight brokerage software, trucking software, and shipping software and has won every major industry award over the last 14 years.

About InMotion Global: InMotion Global, Inc. provides the free, award-winning, patent-pending Transportation Management System, AscendTMS®, to freight shippers, freight brokers, and trucking companies. AscendTMS® is used by thousands of companies in 19 countries, from small single-person logistics operations to multi-billion dollar international corporations, to manage any logistics operation. AscendTMS® is the world’s leading cloud based freight brokerage software, trucking software, and shipping software, and is currently the world’s fastest growing and most widely used TMS solution, adding over 20 new corporate customers per day. InMotion Global, Inc. is headquartered in Brandon, Florida. Learn more at www.TheFreeTMS.com or at www.InMotionGlobal.com.

About Trucker Path:

Trucker Path, recently named to the Red Herring Top 100 List-North America, offers a suite of solutions for the United States freight industry. The core Trucker Path Pro application for iOS and Android platforms provides information for truck operators, including locations of truck stops, weigh stations, parking availability and car wash facilities specialized for trucks. Information gathered on the location of these stops was based on user-generated input and ratings. Each location can be given a star rating by users. By May 2016, the Trucker Path app had been downloaded over 1.2 million times. The community of Trucker Path active users has grown to over 450,000 drivers, representing 30% of all Class 8 truckers in the United States.

AscendTMS

TheFreeTMS.com

The Trucker Path product, Truckloads, is a freight transportation marketplace that helps freight companies find available carriers to haul their shipments. It comes in two web interfaces - one for freight companies, one for carriers, and a mobile app for carriers. Currently Truckloads is the only platform that has access to 30% of Class 8 drivers in the United States.

Trucker Path is based in Mountain View, California with an additional office in Austin, TX. In June 2015, Trucker Path raised \$20,000,000 of capital, which sums up company's total funding to \$21.5M. Trucker Path's ultimate goal is to make the U.S. trucking more efficient, enjoyable and better paying.
