AscendTMS And Lean Staffing Solutions Partner To Provide Expert Low-Cost Nearshore Staffing Services To The Wider Logistics Market

AscendTMS Is Now The Clear Leader In TMS Software Combined With Staffing Solutions

Tampa, Florida – Tuesday August 13th, 2019

InMotion Global, Inc. announced today that AscendTMS, the world’s number one rated transportation management software (TMS), has partnered with the largest nearshore logistics staffing company, Lean Staffing Solutions, to offer bundled TMS software and staffing packages within AscendTMS.

The combination of Lean Staffing Solutions and AscendTMS provides brokers and carriers with on-demand logistics staff at up to 70% less cost than they are currently paying for similar positions in the United States – all inside the AscendTMS software. The widely used TMS technology from AscendTMS is provided at no charge to any Lean Staffing Solutions customers, allowing teams of remote logistics staff to work collaboratively together in real-time.

Tim Higham, president and CEO of AscendTMS, said, “Lean Staffing Solutions is the largest nearshore staffing solution in logistics today, with expert staffing facilities in four convenient Colombian locations. Our 21,000 plus customers are all looking to lower their operating costs – especially their staffing costs – while improving their overall level of service. Our broker and carrier customers asked us to add Lean Staffing Solutions to their toolset inside AscendTMS. As always – we listened to our clients – and we quickly added Lean Staffing Solutions to AscendTMS for them. By using Lean Staffing Solutions,

a broker or carrier will immediately see lower staffing costs - and thus much higher profits overnight.”

Another bonus for Lean Staffing Solutions clients is that they get the Premium AscendTMS software, packaged with instant expert staffing solutions, at no cost. This means they can immediately take advantage of the lower staffing costs by connecting to Lean Staffing Solutions’ Colombian based logistics teams (see [HERE](#) for more details).

Robert Cadena, CEO of Lean Staffing Solutions, stated; “Lean Staffing Solutions is proud to be associated with AscendTMS as many of our clients and prospects already use their number one rated TMS software. Lean Staffing Solutions is perfectly aligned with their vision of high value low cost service offerings that appeal to a broad spectrum of logistics companies looking to quickly cut costs without any loss of service. As the leader in the logistics staffing space, we drive that value proposition home by instantly lowering the staffing costs of any logistics provider using our expert sales, service, and back office staffing services.”

Lean Staffing Solutions’ expert staff are based in four prime locations in Colombia. Their staff speak fluent English and Spanish, all are college educated, and they are fully familiar with the AscendTMS platform, so no special training is required if the broker, 3PL, carrier, or logistics provider already uses AscendTMS. In fact, new logistics staff from Lean Staffing Solutions can be added in AscendTMS in seconds.

Higham continued, “Lean Staffing Solutions have big plans. We have no doubt that the future for North American logistics providers will be a combination of remote teams working collaboratively from different locations, with the lower cost functions of sales, support, and back office roles being based in Colombia, which is conveniently located in the Central time zone. Every big name in logistics is already doing it - because it truly works, and so we are now seeing a flood of interest from the smaller and medium sized broker, 3PL, and carrier so they can catch up, quickly cut costs - and compete.”

AscendTMS is the world’s number one rated TMS software platform, with paying customers in over 20 countries. It’s also the only true-cloud based TMS system, requiring no IT staff, no downloads, no setup, no configuration, no installation, no hardware, and no contracts. It offers complete dispatch control, fully customizable load management screens, free load tracking built into the TMS, free document management, sending of

driver instructions via text from the TMS (and the ability to receive texted replies into the TMS), complete fleet, asset, and driver management, full brokerage management, easy accounting, seamless cash funding on completed loads, full reporting, user role management, branch and agent management, a free truckload rate index, real truck-miles and routes, automated driver pay and settlement, free route and load optimization, free customization, one-dollar EDI connectivity, a driver payment portal, and much more.

About InMotion Global / AscendTMS:

InMotion Global, Inc. provides the free, award-winning, patent-pending Transportation Management System, AscendTMS®, to freight shippers, freight brokers, and trucking companies. AscendTMS® is used by thousands of companies in 19 countries, from small single-person logistics operations to multi-billion dollar international corporations, and can manage any logistics operation.
