C.H. Robinson collaborates with AscendTMS® carrier logistics management software to give small carriers access to the largest network of freight in North America.

Carriers can use AscendTMS to fully manage their entire business operations and directly access all available C.H. Robinson loads in real time thanks to this new collaboration.

Tampa, Florida – December 11th, 2018

InMotion Global, Inc., announced today that AscendTMS, an industry leader in transportation management software (TMS) technology, has collaborated with C.H. Robinson, one of the world's largest third party logistics providers (3PL), to offer access to C.H. Robinson loads in real time to any carrier or owner/operator. The collaboration between C.H. Robinson and AscendTMS extends the power of the largest freight network in North America to the desks of capacity providers.

With AscendTMS, asset-based carriers gain an enterprise-level TMS to manage their trucking and business operations. This technology is available at no cost.

C.H. Robinson joins industry mainstays Truckstop.com and DAT in providing North America carriers with available real time loads inside the AscendTMS software.

A one-stop trucking business solution, AscendTMS allows carriers to access multiple mainstream load sources in a single place, as well as manage their entire trucking and driver operations. This means that carriers using AscendTMS get access to the best load sources for their "*to be empty*" trucks, and can manage every other aspect of their business operations. AscendTMS is the first free cloud-based TMS for carriers that integrates C.H. Robinson's loads directly into its platform.

Tim Higham, president and CEO of InMotion Global, Inc., said, "C.H. Robinson is joining together with AscendTMS to give carriers the ability to run their entire business operations with high end TMS software. This ensures that carriers are healthy, more efficient, well organized and more profitable. With AscendTMS, carriers get one of the best available TMS software technologies to manage any type of trucking operation. By providing access to C.H. Robinson loads, we are giving carriers access to more high quality freight in order to lower their running costs and thus increase carrier profit margins."

"We want to enable small carriers to do business with C.H. Robinson from within the system they are already using," said Tim Kurzhal, director of North America surface transportation at C.H. Robinson. "Integrating our available freight directly into the TMS system that many small carriers already use can help them drive efficiencies and potentially increase profit margins."

AscendTMS is a truly cloud-based TMS system. It connects logistics professionals to the industry standard tools and services that carriers need each day to run their trucking operations profitably and efficiently. It requires no downloads, no install, no setup, no configuration, no contracts and no technical expertise. Users just need an internet connection and a web browser.

AscendTMS provides carriers with a complete business management solution for their entire logistics operations. It provides easy to use features such as full dispatch control, load searching and posting with over 50 load boards, full asset management, driver management, driver pay and settlement, safety and maintenance alerting, a customer CRM with an included 26,000 strong shipper directory, full sales and commission management, shipper and broker credit reports, full accounting and invoicing, real time QuickBooks integration, terminal and agent management, document management, reporting, 80+ ELD integrations, driver texting and responses, a free truckload rate index, IFTA tax reporting, drop trailer support, split load management, Comdata and EFS fuel card imports, cargo claims handling, easy EDI for connection to large shippers and brokers and much more.

About InMotion Global:
InMotion Global, Inc., provides the free, award-winning, patent-pending transportation management system, AscendTMS, to freight shippers, freight brokers and trucking companies. AscendTMS is used by thousands of companies in 19 countries, from small single-person logistics operations to multi-billion dollar international corporations, and can manage any logistics operation. AscendTMS is 100% free to use for the basic system, requires no upfront fees, no annual license cost, requires no downloads or installations, is mobile certified and provides full enterprise level TMS features to manage and operate any logistics operation. AscendTMS is the world's leading cloud-based freight brokerage software, trucking software and shipping software; it is ranked as the number one TMS software by Crowd Reviews, Capterra and Software Advice (a Gartner company). AscendTMS is the world's fastest growing and most widely used TMS solution. InMotion Global, Inc., is headquartered in Brandon, Florida.
