

FOR IMMEDIATE RELEASE

AscendTMS Named Number 1 TMS Software Category Leader By Gartner Digital Insights

AscendTMS Received The Only Perfect Score In the Freight TMS Category

Tampa, FL, September 21, 2021 – InMotion Global, Inc., maker of AscendTMS, the world's #1 rated and most popular Transportation Management System (TMS) software today announced that Gartner Digital Insights had placed AscendTMS in first place in the freight TMS software category with a perfect score of one hundred points out of one hundred points.

Hundreds of TMS software products were judged, but only AscendTMS was given a perfect score, and thus gained first place by a significant margin.

Tim Higham, president and CEO of AscendTMS, said; "Gartner is the singular guiding light when it comes to software decision making in the logistics, trucking, and supply chain space. Their many digital review and software feedback properties, like Capterra, Software Advice, and GetApp, are used by thousands of companies every day to help them choose the right software products to maximize their profits and minimize their costs. AscendTMS is honored to be awarded first place, especially as Gartner gave us a perfect score in each decision-making category."

Gartner's Category Leaders is published by Gartner's GetApp, the recommendation engine SMBs need to make the right software choice. Category Leaders rankings highlight top-ranked North American software products based on ratings from end-users in five key areas: ease of use, value for money, functionality, customer support, and likelihood to recommend.
