AscendTMS To Be The First TMS Provider to Include “In TMS” Truck Parking Reservations Through Agreement With TruckPark

AscendTMS will allow the dispatcher to see forward looking parking spaces ahead for each driver based on their current HoS available and their current average speed - and then reserve parking spots with a single click.

Tampa, Florida – Wednesday, January 29th, 2020.

InMotion Global, Inc. announced today that AscendTMS, the world’s most popular and number one rated transportation management software (TMS), and TruckPark, the largest single digital platform for truck parking reservations, have signed an agreement to allow truck parking reservations to be made directly inside the AscendTMS software platform by fleet dispatchers. This partnership provides the logistics industry with fast, easy access to thousands of secure parking spaces via the AscendTMS software for carrier fleets of all sizes.

Bert Goo, EVP of Partnerships & Channel Marketing at AscendTMS, said; “The key to making driver parking reservations is saving the spaces well before someone else does. This agreement with TruckPark is a first for any TMS provider in that it allows the dispatcher to make the reservation for the driver while he or she is driving, hours before it even crosses the drivers mind. This partnership allows the dispatcher to help their drivers out by seeing all the forward-looking parking spaces available based on the drivers current location, their HoS available, and their average speed. AscendTMS will then provide several parking suggestions on the road ahead for the dispatcher, and allow the reservation to be made in AscendTMS with a single click. The driver is then notified automatically of their reservation by SMS text message or by ELD text message. No other TMS platform has ever done this before.”

Carriers, brokers and shippers use the AscendTMS suite of world class TMS software to better manage their entire organizations logistics and fleet management needs. With this integration, TruckPark extends the benefits of the AscendTMS transportation management solution to provide guaranteed, secure parking for more productive use of the drivers time as they near the end of their available hours of service (HoS) with a higher degree of driver safety and payload security while parked.

“As a company, TruckPark is focused on solving parking challenges in today’s trucking industry and we’re proud that we’re able to help simplify the lives of truckers for thousands of AscendTMS carriers and drivers with this integration,” said Anthony Petite, CEO at TruckPark. “Fleet managers, brokers and digital freight markets can leverage our technology to reduce costs, improve operational efficiency and boost safety. We’re excited to make this new integration available today to any AscendTMS customer.”

###

About TruckPark: TruckPark is driving the digital transformation of parking in the \$700B trucking industry. The company offers truck parking solutions with app-based technology for drivers, parking operators and property owners. Thousands of drivers have access to TruckPark’s free mobile app to find and access secure parking in locations throughout the U.S. For more information visit TruckPark.com.
